

Christmas Storybook Land Operations Safety Procedures Ladders & Scaffolding

Safety is your mission!

1. Ladders & scaffolding shall be inspected each day of operation before use by Safety Committee for damage including broken, bent, loose or missing parts. Ladders & scaffolding that do not pass safety inspection will be immediately removed from service and tagged "Out of Service" for repair or replacement.
2. Choose the proper elevating equipment (ladder or scaffolding) based on working weight load (including tools and decorations) and working elevation height required for job.
3. Ladder & scaffolding use requires a spotter, nearby on ground, to assist & spot for unsafe conditions.
4. Ladder & scaffolding proper use includes not overreaching by standing on top rungs or leaning on rails.
5. Do not mount ladders or scaffolding that set legs are uneven or wobble.
6. Scaffolding platform mounted workers must never pull on fixtures to move rolling scaffolding.
7. Use a ladder to mount scaffolding platform.
8. Do not move scaffold until platform worker is ready to roll.
9. Do not increase scaffold platform set height.
