

Christmas Storybook Land Operations Safety Procedures Fork Lift Truck & Scissor Lift

Safety is your mission!

According to National Institute for Occupational Safety (NIOSH), 20% of forklift accidents involve pedestrians being struck by the forklift or more than 20,000 incidents/year.

Forklift/Pedestrian Accident Prevention Guidelines

- Always yield right of way to forklift
- Look & listen for forklift
- Make eye contact with forklift operator when communicating
- Don't come too close to forklift
- Never ride on forklift
- Never walk under forklift load

Scissor Lift Safety Guidelines

- Pedestrians yield right of way to scissor lift rolling movements
- Scissor lift platform operator never lean or stand on rails
- Scissor lift operation must include ground safety spotter person

THANKS FOR VOLUNTEERING!
